Small Business Website & Google Visibility Kit

By Sitesinc. We build real, working websites, not subscriptions like the rest.

1. Before You Build: Your Business Basics

- Write your exact business name, address or service area, phone and hours. Use them the same way everywhere (NAP consistency).
- List your top 3–5 services and the cities you serve.
- Pick one main goal for the site: calls, form leads, bookings or sales.

2. Domain & Email Checklist

- Buy a short .com or .co domain that you own in your own registrar account.
- Turn on auto-renew and registrar lock.
- Set up a professional email at your domain (for example, you@yourbusiness.com).
- Keep your registrar login. Never let a vendor own your domain.

3. Website Must-Haves

- Phone number you can click on mobile, and a contact form that actually delivers.
- A page for each main service, plus clear pricing or a "starting at" price where possible.
- HTTPS (SSL) on, fast loading on phones, readable text.
- Privacy policy and terms pages.
- A unique title and meta description on every page.
- Real photos of your work and team when you can.

4. Google Visibility Checklist

- Create or claim your Google Business Profile (business.google.com) and verify it.
- Choose an accurate primary category, add hours, services, photos and your website link.
- Add your site to Google Search Console and submit your sitemap.xml.
- Install Google Analytics (GA4) to see where visitors come from.
- Add LocalBusiness structured data (schema) with your name, phone and address.
- Ask real customers for reviews and reply to every one.
- List your business on major directories (Bing Places, Apple Business Connect, Yelp) with the same NAP.

5. Tools Worth Knowing

- Domains/hosting, scheduling, invoicing, business email. See the resource list on sitesinc.co. (Some links may be affiliate links; we disclose that.)

6. Do It Yourself or Have It Built

If this checklist feels like a lot, Sitesinc builds the whole thing for a one-time $1,995: a real, working website you own, set up for Google. No monthly subscription to keep it alive.

Kit buyer credit: The $27 you paid for this kit is credited toward your Sitesinc website build. Mention your kit purchase email when you book.
